

Internal Information

Information of the energy production NPP Dukovany 2015

The energy production of Dukovany Nuclear Power plant in 2015 was 12 607 653 MWh. Compared with 2014 the production lowered by 18%. The reason for the production decrease were shutdowns of the units in the last quarter of 2015. Since 1997 this was the second lowest energy production of Dukovany NPP in it's history.
