

## **Internal Information**

### **Current information about starting up the first and the second units of Dukovany Nuclear Power Plant**

3 units of Dukovany NPP are going to supply electric power by the end of this week.

The Unit 1 has reached the minimum controlled power level and is in operation since today 11/02/2016. Together with Unit 1, Unit 2 is also in a startup mode. Expected start of supply of electric power from both units is on Saturday 13/02/2016. Thereafter units are going to reach the nominal output.
