

Internal Information

INFORMATION ON NPP TEMELÍN

June 22, 2010

Unit 1 is in operation at planned power level. At **Unit 2**, a planned outage is under way, that is connected with the annual refueling of $\frac{1}{4}$ of the reactor fuel. The auxiliary systems are working in accordance with the operation needs of individual units.

The pressuriser node test was not successful. Employees of the power plant will carry out another adjustment of safety valve seating. These works postpone start up of the reactor approximately by one week.

Information on parameters at Unit 1 today on June 22, 2010 at 8:00 o'clock:

- Unit is in Mode 1 - power operation
- Reactor power is 100 %
- Turbine generator output - 1015 MWe
- Electricity production since the beginning of the year: 4 150 840 MWh

Information on parameters at Unit 2 today on June 22, 2010 at 8:00 o'clock:

- Unit is in Mode 5
- Reactor power is 0 %
- Turbine generator output - 0 MWe
- Electricity production since the beginning of the year: 2 903 552 MWh
